

Quantum Transport

Mirco Tollardo, Jacopo Goldoni, Simone Casalino

a.y 2025-2026

- 1 Computing the transmission coefficient
- 2 Density of states
- 3 Transmittance spectrum
- 4 Bound states
- 5 Applications of Electric Fields

Computing the transmission coefficient

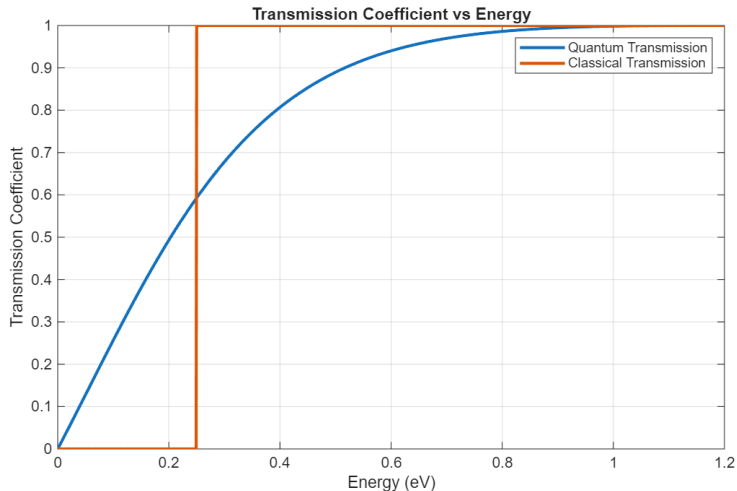

Figure: ADD CAPTION

Computing the Local Density of States

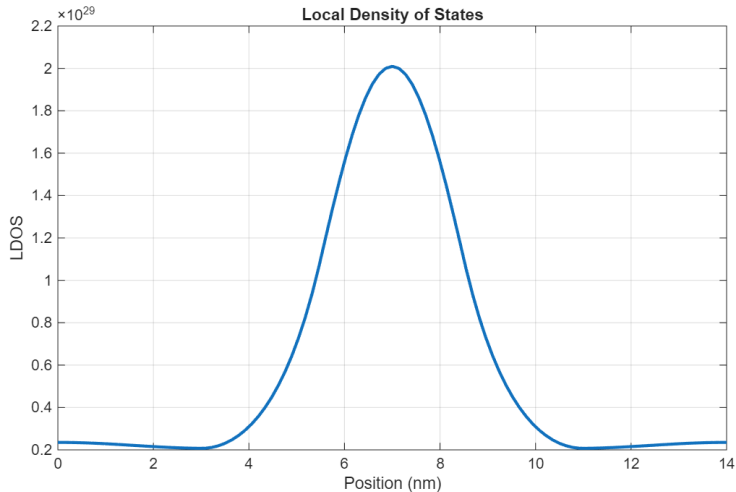

Figure: ADD CAPTION

Transmittance spectrum with one barrier

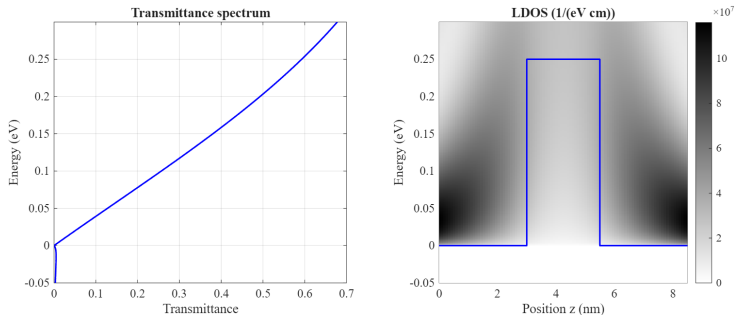

Figure: ADD CAPTION

Transmittance spectrum with 2 barriers

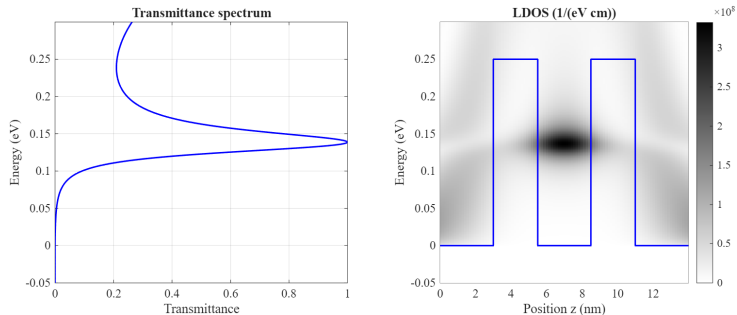

Figure: ADD CAPTION

Transmittance spectrum with 20 barriers

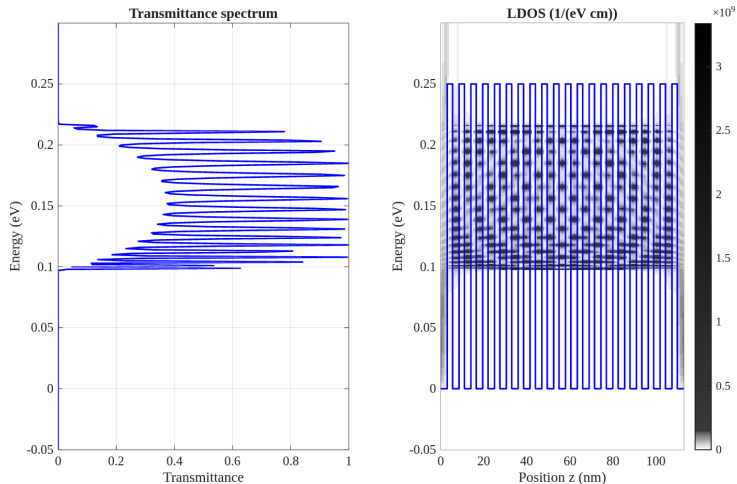

Figure: ADD CAPTION

Computing Bound States

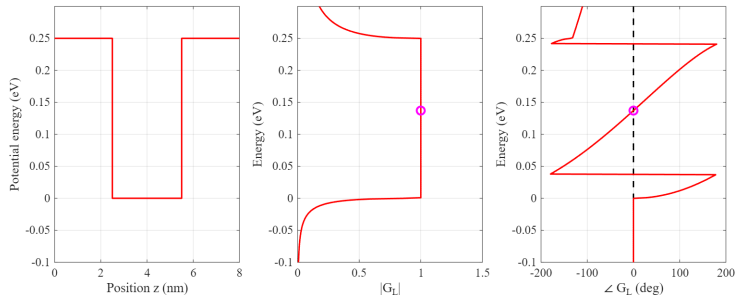

Figure: ADD CAPTION

Transmittance spectrum without Electric field

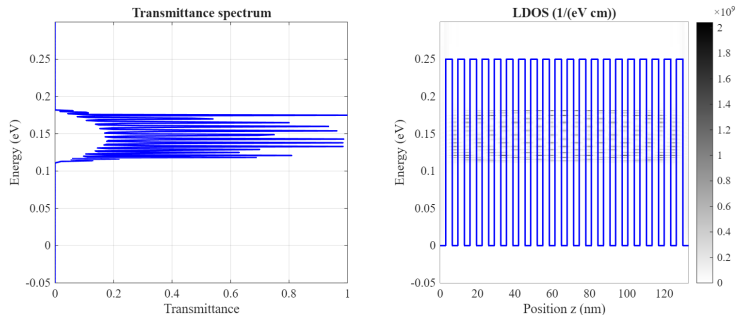

Figure: ADD CAPTION

Transmittance spectrum with Electric field

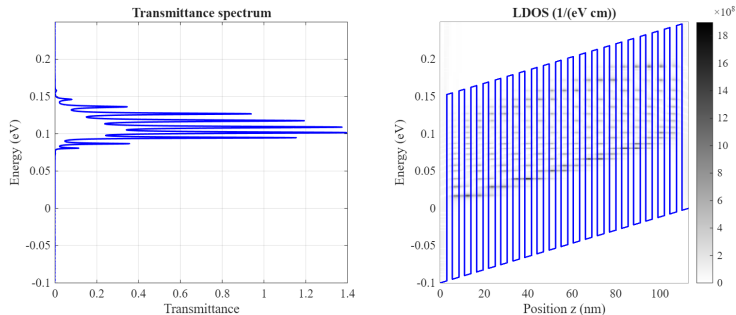

Figure: ADD CAPTION
